

# Flip Flop Book — Alphabet Sounds

Suitable age: 3 up

Prior knowledge required: None

Available  
in hard copy

Available by  
downloadable file

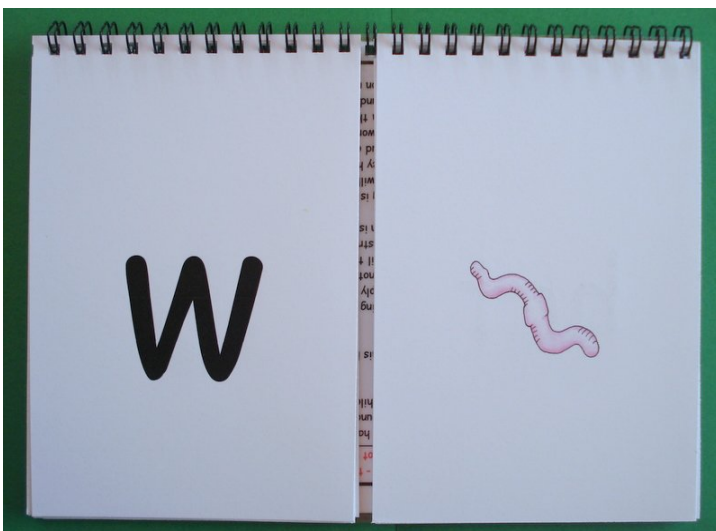

This Flip Flop book has two sides. On the first side of the book the child should identify (or be told) the sound of the letter and then flip over the picture cards (on the right-hand side) until the corresponding object is found (matched by the initial sound).

Once the child can recall all of the 13 sounds, the book can be turned over and the child can practice blending (v-a-n van) by simply reading each word and then flipping over the picture cards until the corresponding picture is found. Please note that the words to be read only use the 13 sounds covered on side one.

There are two books both concentrating on learning 13 sounds, but also on blending those sounds together to read. The first book covers the sounds c, a, t, d, o, g, f, x, v, n, z, i and p, whilst the second book covers the sounds w, e, r, m, j, u, l, h, k, b, s, y and qu. The books can be purchased separately or together as a set.
