~~downloadable file~~

This is a great little A5 book to raise a child's phonological awareness and/or to teach the alphabet sounds.

On the first side of this wire-bound book the child will be learning (or revising) 13 sounds (c, a, t, d, o, g, f, x, v, n, z, i and p).

The child will identify (or be told) the sound on the left-hand side and then flip over the picture cards (on the right-hand side) until the corresponding object is found (matched by the initial sound).

The book can then be flipped over and the child can continue in the same manner with the other 13 alphabet sounds (w, e, r, m, j, u, l, h, k, b, s, y and qu).

Example:
