

Interactive Initial Sound Book — Alphabet Sounds

Suitable age: 3 up

Prior knowledge required: None

Available
in hard copy

Available by
downloadable file

This is a wonderful book which allows children to learn their alphabet sounds or raise their phonological awareness in a fun interactive way. The A5 book and its interactive pieces are all laminated and have velcro fasteners.

The objective of this book is for the child to identify the picture, isolate the initial sound and then find the corresponding letter and place it on. All 26 sounds are covered.

The Interactive Initial Sound Book is made from a combination of 250gsm and 200gsm card and a laminated storage card is supplied for the safe keeping of the letters.

The storage card can also be used quite informally to teach the alphabet sequence.

Example:
