

# Spelling Flip Book — Alphabet Sounds

Suitable age: 3 up

Prior knowledge required: Alphabet Sounds

Available  
in hard copy

Available by  
downloadable file

The idea behind this spelling flip book is so much more than just learning how to spell 23 isolated words. It is about the child learning, in a novel way, how to segment (pull apart words into their sounds: bug = b-u-g).

Children will work their way through (or randomly select one of) the 23 pictures provided on the left-hand side. Using the letter cards the child can spell each of those words by flipping the letter cards over until the correct sound is found.

You will notice that the vowels have been coloured red. If parents wish they can also teach their child about the difference between vowels and consonants.

It is also possible for parents to make words using the flipping letter cards for the child to read. The child can then flip through the picture cards until they find the corresponding illustration.

For slightly older children an answer book can be purchased for an extra \$3.00. This allows children to independently check their spellings.

Example:
