

# Write and Wipe — Alphabet Sounds

Suitable age: 3 up

Prior knowledge required: None

Available  
in hard copy

Available by  
downloadable file

This book has been designed to teach the alphabet sounds and the formation of the lower case letters. Also activities provide practice at blending sounds together to form words (b-e-d = bed) and segmenting in order to spell (bed = b-e-d) in an informal and fun manner.

The Alphabet Sounds Book is suitable for children as young as preschoolers who are interested in learning to read and write. Each A5 page has a laminate covering which means the book can be wiped clean and written on time and time again.

The activities, which include mazes, finding, circling, linking, following tracks, drawing and thinking skills, have been created so the child will want to complete the tasks again.

Initially the parent will need to explain each page (how the activity works). However, after that the child should be able to simply pick up the book and complete a known task quite independently. As the child chooses to use the book again and again the alphabet sounds should naturally and informally be remembered without any structured teaching required.
